DETAILED ACTION

Page 2

- 1. Applicant's election of Group I, claims 1-16 and 19-35, and species stents as device of claim 9, hydrocyclosiloxane of claim 12 and polymeric material of claim 11, in the reply filed on March 04, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2. Claims 10, 14, 17, 18 and 28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and inventions, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on March 04, 2005.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-7, 9, 11-13, 15, 16, 19-21, 23-27 and 29-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hu et al (U.S. Patent 5,463,010) in view of Hostettler et al (U.S. Patent 5,662,960).

Hu et al disclose biomedical devices such as stents (col. 1, lines 27) coated with a plasma polymerized hydrocyclosiloxane monomer such as claimed in the instant invention (col. 10, lines 15-37 and col. 1, lines 20-25, col. 3, lines 48 to col. 4, lines 20). Hu et al fail to disclose pretreating polymer substrate surface using plasma comprising nitrogen containing molecules and oxygen containing molecules.

Hostettler et al teach coated biomedical devices coated with polyurethane-urea polymer hydrogel commingled with a poly (N-vinylpyrrolidone) polymer. Hostettler et al suggest pretreating polymer substrate prior to coating with plasma gas containing oxygen either pure or in air or, mixture of oxygen and one or more non-reducible gases and ammonia improving adhesion (col. 23, lines 30-35 and col. 25, lines 19-24). Hostettler et al also disclose pretreating substrate such as polyethylene by plasma using a mixture of oxygen and ammonia (col. 25, lines 8-50).

Therefore it would have been obvious to a person of ordinary skill in the art at the time of this invention made to utilize disclosure of Hostettler et al in the invention of Hu et al to pretreat polymer substrate such as polyethylene by plasma of a mixture of oxygen and ammonia to improve adhesion.

5. Claims 8, 22 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims are allowable over the art of record because art of record does not teach or suggest pretreat substrate surface with a mixture of N_2O and O_2 .

Application/Control Number: 10/653,655 Page 4

Art Unit: 1773

6. Receipt of Information Disclosure Statement filed September 02, 2003 is acknowledged.

All references have been made of record.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to D. S. Nakarani whose telephone number is (571) 272-1512. The

examiner can normally be reached on Tuesday-Friday from 7:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
